Company Description

IBIS Power is a company developing renewable energy technologies in a most effective and acceptable way for society. Our motto is "Redesigning Renewable Energy", where we take state-of-the-art technology and transform it with added value into products that have highest impact in society towards a green and healthy future. Our team exists from scientist, engineers and architects who work together in R&D and project management to marketing and sales people focusing on implementation and supplying society for highest impact. The recently received EU project includes the complete R&D and business development for the European market of an innovative energy system for the built environment.

Job offering

We offer a full-time position for an Architectural Draftsman coming available per June 1st, 2015. You will closely collaborate with a dynamic team with mostly young professionals ranging from engineers, designers and business developers in the field of renewable energy and sustainability acting on the global market. You will be responsible for preparing CAD drawings and 3D models of our products, with view towards engineering and production. Salary will be based on experience. The position includes the following tasks and responsibilities:

- Take responsibility on producing project documentation and models
- Support the team lead in their tasks with regards to engineering and production of our products
- Evaluate the process and give input for process optimization
- Give input on design optimization
- Support the team lead in the process of securing permits, implementing coding requirements

Job requirements

- Min Bachelor's degree in an Engineering construction or related studies (Bouwkunde)
- Three years of experience in related field
- Experience with preparing project documentation
- Experience with applicable software
- Profound English verbal and writing skills
- Independent worker, but well performing in a team
- Good communication skills

If you are interested, please send us a personal motivation letter, Curriculum Vitae including the names and contact details of three references, and an overview of current research/business interests. Screening of applications will start as soon as applications are received and will continue until the position has been filled.
