### Company Description

IBIS Power is a company developing renewable energy technologies in a most effective and acceptable way for society. Our motto is "Redesigning Renewable Energy", where we take state-of-the-art technology and transform it with added value into products that have highest impact in society towards a green and healthy future. Our team exists from scientist, engineers and architects who work together in R&D and project management to marketing and sales people focusing on implementation and supplying society for highest impact. The recently received EU project includes the complete R&D and business development for the European market of an innovative energy system for the built environment.

### Job offering

We offer a full-time position for a Site Manager coming available per July 1<sup>st</sup> 2015. You will closely collaborate with a dynamic team with mostly young professionals ranging from engineers, designers and business developers in the field of renewable energy and sustainability acting on the global market. You will take part of the project team to deliver our product to customers and to offer them customer services. The technology is in preparation phase of market out roll, and needs the input of the first customers to further optimisation. Salary will be based on experience. The position includes the following tasks and responsibilities:

- Assist at installation of IRWES units
- Take responsibility on facility management
- Be the first line communication on customer feedback
- Give input to research and project team based

### Job requirements

- High expertise on electrical and mechanical engineering
- Five years of experience in related field
- Familiar with building technical aspects
- Profound Dutch and English verbal and writing skills
- Entrepreneur, flexible and committed personality
- Independent worker, but well performing in a team
- Good communication skills
- Driving license and experience

If you are interested, please send us a personal motivation letter, Curriculum Vitae including the names and contact details of three references, and an overview of current research/business interests. Screening of applications will start as soon as applications are received and will continue until the position has been filled.
